Re: Asbestos Disposal Sites
Millington, NJ

Dear Mr. Robinson:

As we agreed in our phone conversation on September 17, 1986, we will be changing the locations of the monitoring wells at the New Vernon Road Site to the asbestos pile located behind the 257 New Vernon Road residential home. The need for this change became apparent when Mr. Tielmann, the homeowner, informed us that a significant amount of asbestos-containing materials had been disposed in the back part of his lot. Thus, the three monitoring wells will be located in the vicinity of this asbestos pile instead of the locations which appear in the Site Operations Plan.

Sincerely,

FRED C. HART ASSOCIATES, INC.
